PROFESSIONAL SUMMARY

Backend Developer with strong hands-on experience in backend development, clean code practices, system integration, and microservices architecture. Passionate about writing efficient, scalable, and maintainable code, while continuously learning and applying modern development techniques.

SKILLS

Languages: C#, PHP, JavaScript, HTML, CSS, MySQL | **Frameworks:** .NET, Laravel
Tools: Git, Docker, Postman, Azure, SQL Server Management Studio (SSMS) | **Technologies:** Microservices, IBM MQ, RabbitMQ

WORK EXPERIENCE

Backend Developer
Datateam Solutions
📅 December 2024 – Present

- Develop and maintain backend systems for live projects, including writing new features and services using .NET, Microservices architecture, and MySQL/SSMS, ensuring functionality, stability, and scalability.
- Design, debug, and refactor backend components by applying clean code principles and design patterns, enhancing system performance, reliability, and long-term maintainability.

Full-Stack Operations Software Engineer
Pfizer Bootcamp (via CodeHub)
📅 October 2024 – November 2024

- Attended an intensive seminar focused on Laravel, Vue.js, and MySQL.
- Gained hands-on experience with modern full-stack web development and database integration practices.

Backend Developer Intern
Omikron44
📅 April 2024 – June 2024

- Developed and maintained backend functionalities using Laravel, PHP, and MySQL.
- Engaged with APIs and used Postman extensively for testing and development.
- Integrated RabbitMQ and ElasticSearch with Docker, improving application messaging and search capabilities.
- Contributed to frontend enhancements using JavaScript and CSS.

Client Project: EnergiaXpert Web App (Live URL: [EnergiaXpert](#)) - With ASP.NET Core MVC, MySQL, Azure.

EDUCATIONBachelor of Applied Informatics
🎓 *Department of Applied Informatics, University of Macedonia, Thessaloniki*
September 2019
